

SURYA VENKATA RAJEEV KADIYAM

DeKalb, IL 60115 | 630-360-2446 | svr.kadiyam@gmail.com | [LinkedIn](#)

Professional Summary

Detail-oriented Data Analyst and Management Information Systems graduate with hands-on experience in SQL, Python, Tableau, Excel, and SAP ERP. Expertise in building KPI dashboards, automating reporting workflows, and translating complex datasets into actionable insights across. Proven ability to conduct business research, collaborate with stakeholders to drive organizational excellence. Aiming to leverage analytical skills and effective communication in a Data Analyst or Business Intelligence roles.

Education

Master of Science: Management Information Systems; 3.77 GPA **May 2026**
Northern Illinois University **Illinois, USA**

- Fall semester, 2025 - Honor Roll
- Graduate Assistantship Scholarship Recipient

Skills

Languages & Query : SQL, Python (Pandas, NumPy), MySQL, MongoDB
BI & Visualization : Power BI, Tableau, SAP Analytics Cloud, SAP Fiori, Excel
Cloud & Data Infra : Snowflake, Azure Data Factory, AWS, ETL, Data Warehousing
Analytics & Methods: Data Modeling, Data Governance, KPI Reporting, Statistical Analysis, Forecasting, Root Cause Analysis
Professional : Agile Methodology, Business Development, Stakeholder Management, Process Improvement

Experience

Survey Research Assistant **June 2025 to May 2026**
Illinois Department of Public Health **Illinois, USA**

- Analyze survey responses and generate reports supporting public health planning and resource allocation.
- Supported trend analysis and evidence-based decision making by providing reliable, clean datasets that informed public health strategies.
- Conducted and validated structured health survey data collection across Illinois to ensure accurate insights for public health initiatives.
- Performed data quality checks and ensured compliance with data confidentiality standards to protect sensitive information.

Business Consultant **August 2025 to December 2025**
LRS **Illinois, USA**

- Prepared executive presentations that clearly communicated complex findings to leadership, facilitating informed decision-making.
- Developed data-driven recommendations and competency-based training frameworks for stakeholders.
- Conducted business research and requirements analysis to inform sales training initiative.

Graduate Teaching Assistant **August 2025 to December 2025**
Northern Illinois University – College of Business **Illinois, USA**

- Facilitated Business Intelligence and Data Visualization courses for graduate-level cohorts, enhancing student comprehension.
- Mentored students in Tableau, Power BI, Excel, SAP Analytics Cloud, and Python analytics, fostering practical skills.
- Clarified advanced analytics concepts and reporting techniques for diverse, cross-functional audiences, improving understanding.

Campus Dining Student Manager **August 2024 to June 2025**
Northern Illinois University **Illinois, USA**

- Supervised daily operations of high-volume campus dining facility, ensuring optimal service delivery with 10+ staff members.
- Managed scheduling and workflow coordination to maintain service quality and meet operational KPIs.
- Tracked operational metrics and customer feedback to identify areas for continuous process improvements.

Engineering Data Analyst **January 2024 to May 2024**
Tech Mahindra **Hyderabad, India**

- Analyzed device logs and telemetry datasets to enhance performance monitoring and facilitate timely issue detection.
- Improved data accuracy by 25% through rigorous cleaning, validation, and standardization processes.
- Developed KPI reports and interactive dashboards to improve operational visibility for engineering teams.
- Conducted root-cause analysis to shorten issue resolution time through data-driven diagnostics.

Data Analyst Intern	January 2024 to February 2024
Unified Mentor	Hyderabad, India
• Executed end-to-end data analysis with SQL, Python, Excel, Power BI, and Tableau to support data-driven decision making. • Analyzed business trends and presented actionable insights through visualizations, facilitating strategic planning. • Built dashboards and automated reporting workflows, reducing manual reporting effort.	
IoT Data Engineer (Intern)	June 2023 to July 2023
Cyient	Hyderabad, India
• Built ETL-ready datasets and conducted data quality checks, supporting accurate downstream analytics. • Processed 5,000+ IoT telemetry records daily, enhancing pipeline reliability and maintaining data quality. • Enhanced data accessibility and ensured reporting consistency across IoT monitoring systems.	

Projects

Predictive Customer Churn Analytics
• Built predictive machine learning models using customer behavioral and transactional datasets containing 50,000+ records to identify customers at risk of churn. • Engineered machine learning classification models achieving 92% accuracy; created executive stakeholder dashboards visualizing churn risk segments.
Supply Chain Forecasting & Optimization
• Developed ARIMA and Prophet time-series forecasting models; built Power BI dashboards for supply chain visibility and decision support. • Presented actionable recommendations that supported inventory optimization and reduced decision-making cycle time by 12–15%.
Pet Shelter E2E Database Management System
• Designed and implemented a relational MySQL database to manage pet intake, adoption records, medical history, and shelter operations. • Developed SQL queries and reporting mechanisms that improved data accessibility, operational visibility, and cross-functional coordination.
